'ENERGY MATTERS'

Gas fireplaces

www.socalgas.com

Highly efficient natural gas fireplace inserts can heat up to 1,000 square feet of living space at a low cost.

Natural gas fireplace inserts or free-standing stoves not only help keep a house clean, but create less pollution than wood-burning fires.

Along with gas logs, add an elegant cast-iron fireback to the fireplace to promote heat transfer into the room.

Install glass doors in front of the fireplace to help keep warm air in the house.

Use energy wisely. Don't run natural gas logs when not in the room to enjoy them.
